

## Pronouns – Grammar and Representation

Edited by Horst J. Simon and Heike Wiese  
Humboldt University Berlin

The contributions of this thematic collection center around the typology of pronominal paradigms, the generation of syntactic and semantic representations for constructions containing pronouns, and the neurological underpinnings for linguistic distinctions that are relevant for the production and interpretation of these constructions. They come from different theoretical approaches and methodological backgrounds and take into account data from a wide range of Indoeuropean and non-Indoeuropean languages. Bringing together a cross-section of recent research on the grammar and representation of pronouns, the volume offers a kaleidoscope of studies united by the common topic of pronouns as a domain of language that exemplarily shows the interaction of different components responsible for computational (syntactic and semantic), lexical, and discourse-pragmatic processes.
