Clinical Communication Skills Scale – Short Version (CCSS-S)

These questions are aimed at capturing fundamental abilities in holding and formulating therapeutic conversations.

*Please evaluate how appropriately the therapist applies the skills listed below.
Note that the response scale ranges from the poorest score on the left to the best score on the right.*

The therapist ...

	Not at all appropriately	Not particularly appropriately	Generally appropriately	Entirely appropriately	Not possible to evaluate
1. Makes use of appropriate facial expressions and gestures. (4)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2. Does not judge the patient. (11)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
3. Gives the patient time to talk and to ask questions. (13)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
4. Discusses content and procedure for the current session. (14)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
5. Summarises interim results (15)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
6. Ensures that the discussion has a logic running through it. (17)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
7. Uses open questions to motivate the patient to talk. (19)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
8. Uses closed questions to focus the discussion. (20)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
9. Uses easily understandable language (21)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10. Reacts with empathy to the feelings of the patient. (25)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
11. Works through content together with the patient. (26)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12. Explores thoughts, feelings and behaviour of the patient. (27)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
13. Ensures that the patient understands by asking questions. (31)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
14. Clarifies imprecise patient statements. (32)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

*Numbers in brackets are item numbers of the long scale (Kühne et al., 2021)

*Yellow color = Collaboration

*Green color = Structuring und Exploration
