Hi, we are a research group at HU-Berlin investigating Human Cognition and we are (still) looking for participants for the following study.

Study Title: Attentional Selection and Amplification in Perception and Working Memory

Description:
This is an in-person fMRI experiment where you will be asked to memorize and report the orientation of visual stimuli. There will be 4 fMRI sessions, each lasting about 2 hours.
If you are interested, please use the following link to join the Online Screening Experiment (about 1 hour, also paid).
Please use Google Chrome and DO NOT SWITCH screens once the experiment starts.
https://urldefense.proofpoint.com/v2/url?u=https-3A__studies.bccn-2Dberlin.de_publix_xxZjS1V0kog&d=DwIGaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=6tXAqg2Z_D_U17H9w10r4Q&m=-3FLV73hxAj_YVNUHA4Cgp5eTti6EQKumflQZMaBTNvDPXHdJBrTWw0oWDf2fM1q&s=CYDz8DEkPO4C5RAe9zLDiqlkt0TqnBEYByHKIc8vfTo&e=

After completing the Online Experiment, you will be asked a few questions to help us determine if you fit the criteria for the follow-up fMRI study.
To confirm your participation in the Online Experiment, a unique completion code will be given to you at the end. Please send us the completion code and your IBAN or PayPal by email (disco-studies@bccn-berlin.de), OTHERWISE YOU CANNOT BE COMPENSATED.

After we confirm your submission of the Online Experiment, we will pay you directly to the account provided. In case you are selected for the follow-up fMRI Experiment, we will get in touch via email.
You can earn up to 138€. The compensation for completing the online experiment is 12€. The compensation for every fMRI session is 24€. If you complete all the sessions, you will receive a bonus of 30€.
