

## List of Candidates for the student council BCE election 2026

**Chiara Strachardt**

1. year M.Ed. Chemistry & WAT

*I am running again for the FSR BCE because shaping things is better than complaining, cool events make studying more enjoyable, and everyone eventually needs someone who listens.*

**Harshini Praveen Kumar**

2. year M.Sc. Bioinformatics

*I am nominating myself for the Student Council because I like being involved and contributing beyond my own studies. Also because I enjoy being in a positive and supportive environment. I want to be someone who helps students navigate tricky situations, feel supported, and know that they are not alone. Making university a little easier, together right???*

**Joel Abraham**

1. year B.Sc. Chemistry

*As part of the FSR BCE, I want to advocate for a pleasant study environment, with the interests of the students taking center stage. Joint events and other activities should not be neglected either. Through social media, the student body should have the opportunity to always stay informed.*

**Niklas Tresch**

1. year M.Ed. Chemistry & French

*I particularly want to actively help shape the teaching study programs and support my fellow students with advice and assistance.*

**Luca Alacán Friedrich**

2. year M.Ed. Chemistry & History

*I have now been involved in student self-administration, events, and advocating for students and the feasibility of studying at the university for 6 years. I would like to continue this work in my final year here at the Potsdam University and stand up for you!*

*Best regards, Luca*

**Nils Hubach**

4. year B.Ed. Chemistry & English

*I enjoy doing this and would like to run for election again because I have handled the finances so far and want to continue doing it, since nobody else wants to.*

**Paul Doepner**

6. year B.Sc. Chemistry

*Hi, I would like to continue getting involved in the student council to represent the interests of the student body, help as a contact person with problems, and make everyday student life more enjoyable for everyone.*

**Sarah Emmler**

3. year B.Sc. Bio Sciences

*Hello dear students! I have been active in the student council since my first semester and work to ensure that students are heard and receive support. Personally, my goals are to improve the awareness of lecturers regarding chronic illnesses, disabilities, and any limitations that restrict students and create barriers. Every student should be heard, even if a limitation is not visible!*

**Simon Haberkorn**

2. year B.Ed. Chemistry & Geography

*I want to get involved in the Student Council because I like to advocate for and support students at the university. Above all, I want to participate in event planning and organization and work with many kind, sweet, and dedicated people in the Student Council to have a great time and lots of fun during our studies.*
