International Calls and Information for the Faculty of Human Sciences

Teaching or working abroad with Erasmus+

30 June 2022

The success story of the Erasmus program is now entering a new chapter. Erasmus+ is providing a total of 14.8 billion euros for European students from 2014 to 2020, and 4 million people are supposed to benefit from the program. Erasmus+ will also be a central component of our activities abroad in the future. All of the measures associated with Key Campaign I - study abroad for students, teaching abroad and personal mobility for employees from technological and administrative units - are brought together in the International Office.

Dioscuri Programme: Launch of first call for proposals in the Czech Republic

25 July 2022

With the person-centered funding program already well established in Poland, the Max Planck Society (MPG) and the Czech Ministry of Education, Youth and Sports (MEYS) are now looking for talented scientists to establish their research group at a Czech research institution. Up to three Centre leaders will be funded in the frame of the first call for Dioscuri Centres in the Czech Republic. Early-career researchers from all scientific disciplines are invited to submit their application for a Dioscuri Centre until July 25th, 2022. Going beyond the scope of a project grant, a Dioscuri Centre is built around a distinguished researcher position. It is awarded to excellent scientists capable of establishing and leading an outstanding, highly visible research group. The Dioscuri Programme aims to strengthen and expand scientific excellence in Central and Eastern Europe and is currently being implemented in Poland and the Czech Republic. The funding for the Dioscuri Centres is shared equally between the Federal Ministry of Education and Research and the MEYS.

L'Oréal-UNESCO For Women in Science Young Talents Programmes: Egypt

30 July 2022

Women scientists at doctoral and/or post-doctoral level around the world are invited to submit their application for one of the national and regional L'Oréal-UNESCO For Women in Science Young Talents Programmes. With the aim to support and encourage young women researchers who represent the future of science, the 52 L'Oréal-UNESCO For Women in Science Young Talents Programmes around the world help them to pursue their research in institutions at home or abroad.

Project-related exchange of persons programme (with various countries)

The focus is on initiating or intensifying binational research activities in partnership between a German and a foreign higher education institution or research institution in order to strengthen academic relations. Particular importance is attached to the qualification of young academics. The programme promotes mobility and short-term stays for the exchange of project participants from the participating partner institutions, especially young researchers, for research activities.
