

International Calls and Information For the Faculty of Human Sciences

Leonhard Euler-Programme

29 January 2021

The aim of the programme is that contacts are established between young foreign scientists/students and German universities and that further qualification of young researchers takes place. Funding is available for scholarships for foreign graduates and doctoral students. Foreign graduates, doctoral candidates and university teachers from the countries specified in the programme announcement as well as German university teachers are being funded.

Carlo Schmid Programme for Internships in International Organisations and EU Institutions

11 February 2021

The Carlo Schmid Programme familiarises outstanding students and graduates with the problems and working methods in the international administrative field within the framework of an internship and contributes to the expansion of their intercultural competence. In addition, accompanying activities are designed to further improve the prerequisites and opportunities of these young people for later employment in the international field of activity. The programme is aimed at German students and graduates from all academic disciplines. Applicants should have already dealt with international topics during their studies.

Philipp Schwartz Initiative for researchers at risk

05 March 2021

The programme allows researchers who are no longer able to work in their own countries because they are threatened or persecuted to continue their work at German universities and research institutions. In the context of the Initiative, the Humboldt Foundation cooperates closely with international partner organisations such as the Scholars at Risk Network, the IIE Scholar Rescue Fund and the Council for At-Risk Academics. The Philipp Schwartz Initiative enables universities and research institutions in Germany to host researchers at risk on the basis of a full fellowship.

Fled scientists: DFG continues to facilitate collaboration in research projects

The DFG will continue to enable this target group to integrate into the German research system in 2021. It encourages qualified individuals from all scientific career stages with a refugee background to be employed in DFG-funded research projects. Generally, it is possible in all DFG funding programmes to fund refugee researchers with funds that have already been approved, without the need for a separate additional application to the DFG. The supplementary applications can be submitted informally at any time and should not exceed the length of five pages (without curriculum vitae and bibliography).
