

Evolutionary Biology & Genetics Colloquium

WiSe 2023-2024

Mondays at 16:15hs (CET), Haus 25, Room B0.01
or by zoom (link will be send by email a week before)

Date	Speaker	Title
Apr 8	Marvin Schäfer	Fantastic life of the Saber-toothed Frogs
Apr 15	Dr. Lorenzo Marchetti (Museum für Naturkunde, Berlin)	What do trace fossils tell us of early terrestrial vertebrates?
Apr 22	Eva Deinum (Wageningen University)	tba
Apr 29	Dr. Philipp Denninger (TU Munich)	tba
May 6	Tobias Lenz (Uni Hamburg)	Evolutionary trade-offs in immunity shape genomic variability of the major histocompatibility complex (MHC)
May 13	Agustin Elias-Costa	Diversity and evolution of vocal sacs in frogs
May 20	Pentecost Monday	
May 27	Juan Masello (Uni Bielefeld)	Using next generation sequencing to disentangle the diet of Antarctic and sub-Antarctic penguins, with particular emphasis on optimal and sub-optimal locations
Jun 3	Pablo Lavinia (CONICET, Argentina)	tba
Jun 10	Nataliya Budaeva	Cryptic vs. widespread species in marine annelids – a paradigm shift over the last 100 years
Jun 17	Dominique Mediodia (Academia Sinica, Taiwan)	3D geometric morphometrics of otolith shape to unveil fish evolutionary history
Jun 24	Nicolas Straube	Ichthyological collections as DNA archives
Jul 1	Dr. Sanjukta Chakravorti (Staatliches Museum für Naturkunde, Stuttgart)	tba
Jul 8	Stephanie Woodgate (Museum für Naturkunde, Berlin)	Evolution of form and function through time and geography: <i>Podarcis pityusensis</i> as a microevolutionary model
Jul 15	Dr. Plamen Andreev (Naturalis Leiden)	Tooth and bone, inseparable partners in the dentition of early ‘sharks’
