

Evolutionary Biology & Genetics Colloquium

Winter 2021 – 2022

Unless noted all talks are on zoom only

| Date | Speaker | Title | Host |
|---------------------------|---|---|-------------------|
| 25 October | Introduction for enrolled students only | | |
| 1 November | <i>available</i> | | |
| 8 November | Rebecca Nagel (U Bielefeld) | Fitness consequences of niche choice and conformance in the Antarctic fur seal | Alice Dennis |
| 15 November | Ricardo Pereira (LMU München) <i>This talk will be held in “hybrid” presence</i> | Extensive introgression despite Haldane’s rule: insights from a grasshopper hybrid zone | Marisol Domínguez |
| 22 November | Luis Valente (Naturalis) | Using phylogenies to study macroevolution and anthropogenic extinction on islands | Marisol Domínguez |
| 29 November | Mark Hauber (U Illinois) | Species recognition in brood parasitic birds and their hosts | Ralph Tiedemann |
| 6 December | Andrew Sinnott (U Potsdam) | Sexual selection in Glowspot cockroaches | Ralph Tiedemann |
| 13 December | <i>available</i> | | |
| 20 December & 27 December | | <i>Christmas holiday</i> | |
| 3 January | Binia De Cahsan (U Copenhagen) | Road to extinction? Past and present population structure and genomic diversity in the koala (<i>Phascolarctos cinereus</i>) | Katrin Kiemel |
| 10 January | Xavier Vekemans (U Lille) | Whole genome duplications and dynamics of the self-incompatibility system in Brassicaceae: two inter-connected evolutionary processes | Michael Lenhard |
| 17 January | Susann Wicke (HU Berlin) | Parasitic plants | Michael Lenhard |
| 24 January | Laila Moubayidin (John Innes Centre) | Genetic, molecular, and cellular mechanisms orchestrating radial symmetry establishment in <i>Arabidopsis thaliana</i> | Michael Lenhard |
| 31 January | Mozes Blom (Berlin Naturkundemuseum) | A genomic perspective on biodiversity and natural history research | Alice Dennis |
| 7 February | Edwige Moyroud (Cambridge U) | Flower colour patterns | Michael Lenhard |
