

We are looking for a

Research assistant in animal ecology

(with or without Bachelor degree)

The animal ecology group has a vacancy for a research assistant. The tasks are mainly focused on helping with various scientific projects in the field and within our experimental fields in Potsdam Bornim.

The tasks include

Assistenz beim Lebendfang von Kleinsäugetern

- assistance with live trapping of small mammals
- assistance with conducting behavioural experiments/tests
- assistance with the recording of morphological data (weight, body measurements)
- assistance with the collection of fecal samples to determine stress parameters.

We are looking for students from Biology, Ecology or similar fields who

- are interested in research questions of animal ecology
- work independently and on their own responsibility
- who are willing to work early hours or late nights
- like to work outside and like hands on work
- wants to contribute to research projects

If you are interested please contact us via mail (animal-ecology@uni-potsdam.de) with a short description of yourself and why you interested in the position. We are looking forward to meeting you!
