Printing Instructions

1. Print all materials in duplex mode, ideally in color, on **DIN A4 paper.** Verify that "Flip to long edge" or "Rotate sheet over long side" is selected in the **print settings**. Make sure that "Adjust", "Fit to page", or "Fit to print area" is also selected. These can typically be found under "Page Setup" or "Other Settings" in the printer menu.

2. **Rulebook:** Place pages 1 to 6 on top of each other. Check that the sheets are arranged in ascending order and **fold** the sheets in half to create the rule book.

3. **Game Board:** The game board is printed on pages 7 to 14. Cut out the marked areas and **glue** the individual pieces together as indicated. First, glue the upper pieces together (LS phases 1 and 2). Then the lower pieces (LS phases 3 and 4). Finally, glue the lower pieces (LS phases 3 and 4) to the upper game board pieces (LS phases 1 and 2).

4. **Logbook:** Staple pages 15 through 20 together to create the logbook.

5. **Lesson plan:** The lesson plan on pages 21 and 22 is ready to use.

6. **Cards:** Cut out all quiz cards, action cards, teacher cards, student cards, and observation cards, as well the "Learning Activity Curves" (pages 23–72).

7. **Token:** You can use any available token for this game. If you do not have one available, you can use our print-out version (page 73) to build your own.

8. **Victory points:** On page 73 you will also find the victory points. Cut them out and pile them up.

Now you are ready to start playing!
