

Position Title: Co-Founder and Chemical Engineer - Methane Capture Project

Location: Berlin, Germany

About MooGreen:

MooGreen is an ambitious startup dedicated to developing innovative solutions at the intersection of sustainable agriculture and renewable energy. Our mission is to combat climate change and reduce energy costs for farmers by capturing methane emissions from cows and converting them into valuable bioenergy.

Role Overview:

We are seeking a passionate Chemical Engineer to join our team as a Co-Founder, contributing technical expertise and strategic leadership to drive the success of our project.

Responsibilities:

- 1. Technology development and optimization:**
 - Lead the design and development of cutting-edge chemical processes crucial to methane capture technology.
 - Optimize chemical processes, ensuring not only efficiency but also sustainability and alignment with environmental standards.
 - Always looking for ways to improve in technology for enhanced performance.
- 2. Collaboration with interdisciplinary teams:**
 - Collaborate closely with mechanical engineers, scientists, and stakeholders to integrate chemical and mechanical components.
 - Foster a collaborative and innovative environment within the technical team, encouraging effective communication and cross-disciplinary knowledge sharing.
- 3. Research and development:**
 - Stay up to date of emerging technologies and trends in methane capture and chemical engineering.
 - Actively contribute to ongoing research and development efforts, bringing valuable insights to enhance the project's technological capabilities.
 - Demonstrate a commitment to continuous learning about advancements in the field.

Qualifications:

- Bachelor's or master's degree in chemical engineering or a related field.
- Entrepreneurial mindset with the ability to drive technical innovation.
- Analytical and problem-solving skills.
- Excellent communication and collaboration skills.

Benefits:

- Co-founder equity stake in the startup.
- Work on a groundbreaking project with a positive environmental impact.

- Build and lead a dynamic team.

How to Apply: If you are passionate about sustainability, possess expertise in chemical engineering, and are ready to play a key role in a startup with a meaningful mission, we invite you to submit your resume to moo-green@outlook.com with the subject "Chemical Engineer Co-Founder Application - Methane Capture Project."
