

## CTO Co-Founder Job Offer

-Personal Safety App-

### Company description

We focus on personal safety. **AKC Connect** wants to change the way we protect ourselves and the ones we love from accidents, incidents, and crimes. We have a solution that uses Machine Learning and Artificial Intelligence to completely automate self-help in life threatening situations.

### Job description:

The role of the CTO at AKC Corps will be to develop the application needed to run our innovative technology. The development of the front and back-end of the application will be the responsibility of the CTO. The developer must be capable of writing an iOS and/or Android application that:

- can communicate through Bluetooth
- can determine the geo-location of other smartphones nearby
- communicate to nearby cellphones through the same app in real time
- can send multiple messages simultaneously

The ideal programming platform is **Flutter (Dart)** but we are open to **REACT (JavaScript)** or **Java**. The CTO must be able to work under pressure. As we are a startup, things can get really tight very fast. The CTO will be responsible for the deployment, the monitoring, the updating, and the maintenance of the application. The CTO will be the lead developer and can request the help of part time programmers for the completion of the tasks.

### Why Join Us:

- flexible work schedule based on milestones and deadlines
- competitive salary as stated within EXIST program
- vested equity in the company over the next years
