

M E M O D I O

Full-Stack Software-Engineer (Full-time, m/w/d)

memodio is the world's first medical app for dementia prevention.

Up to **6 million people** in Germany suffer from an early form of dementia, but so far there are no medications or therapies on the market for these early stages of the disease. We are a team of doctors and a software developer and bring the latest scientific findings on digital prevention of dementia into practice. memodio is a **medical app** that offers a therapy plan tailored to pre-dementia patients, giving them back their quality of life and improving their cognitive abilities.

Our vision is that through our app we equip hundreds of thousands of people with a tool to challenge their minds and maintain their personality every day. But we can only achieve this as a team.

In order to further develop the app holistically, from January 2022, we are looking for a

Senior Full-Stack Software Engineer (m/w/d)

- Full-time
- Flutter & node.js stack
- Flexible working hours + home office possible

What do we offer?

- ✓ An attractive compensation with participation in the success of the company
- ✓ A young and dynamic team with flat hierarchies
- ✓ Great career progression possible, also to leadership positions (if desired)
- ✓ The opportunity to solve a huge problem and improve the lives of many people
- ✓ A lot of variety in your everyday work, you will learn a lot about start-ups and entrepreneurship
- ✓ A lot of self-determined work and freedom to make decisions - you are an integral part of the team from the very beginning and work closely with the founders
- ✓ Attractive lakeside location at Griebnitzsee, directly at the S-Bahn, with flexible working hours and home office

M E M O D I O

Your skills

- ✓ At least three working years' experience in software development (frontend & backend)
- ✓ Ideally, very **advanced knowledge of Flutter & Dart**, possibly experience with similar Frameworks such as React-Native or native Apps in Kotlin or Swift
- ✓ **Good knowledge of node.js** or comparable backend technologies
- ✓ **Good knowledge of relational databases**, especially PostgreSQL
- ✓ High demand of clean code, extensive Software-Engineering and OO Design Background

Who are you?

- ✓ You are a technology-enthusiast and are keen to learn and try out new things
- ✓ You have proven in the past that you can develop complex software systems and take it take them on the next level
- ✓ You are driven to make a difference. You take responsibility for your tasks from start to finish.
- ✓ You are a good communicator, empathetic and can accurately translate user stories into code.
- ✓ You appreciate hybrid working and can also work with the team in Potsdam on a regular basis.
- ✓ You speak fluent German or English

Do you want to make a difference?

Send us an informal email with your CV, rough salary expectations and your earliest start date.
