SOFTWARE DEVELOPER
WANTED (M/F/D)

Digital Rheuma Lab.

SOFTWARE DEVELOPER (M/F/D) WANTED

WHO WE ARE

At Digital Rheuma Lab, we research, develop and support digital solutions for patients with chronic rheumatic diseases. We work in a team consisting of affected patients, marketing, product and software experts as well as experienced physicians to make our vision of a more efficient, patient-centric rheumatology care reality!

WHO WE ARE LOOKING FOR

- Hands-on attitude
- Willingness to learn and make a difference
- Experience building a data model and implementing it via MySQL or PostgreSQL.
- Experience with backend frameworks (min. 1: Node.js, Python, C#, Go)
- Bonus: Experience in frontend or app development (React, React Native, Flutter).

WHAT YOU CAN EXPECT WITH US

- The opportunity to play a key role in building our startup
- A super motivated, interdisciplinary team and regular team events
- Insights into all aspects of a pre-seed digital health startup
- Long-term development opportunities, flexible collaboration models, and the prospect of co-founding a company
- The opportunity to contribute to our success remote or onsite
