## Working student (f/m/d) - Process Automation

### The role

We are looking for a passionate students to engineer with us the next generation platform - enabling citizen developers to define and automate work processes with the power of "no-code". Support our agile development team in entering the age of business process automation by bringing together RPA, workflow management, process analytics and collaboration solutions.

### Expectations and Tasks

- Guidance and support for our application users in operational and administrative tasks in day-to-day business
- Analysis, visualization and reporting of data in Microsoft Office products
- Maintenance of internal SAP systems with an eye for details and a high level of quality awareness
- Support and / or coordination of projects, e.g. for collaboration, process optimization or process automation
- Taking on tasks and inquiries in day-to-day business in a self-responsible manner, but always transparently and collaboratively

As a student (f / m / d) in our team you will:

- Get detailed first-hand insights into the support process and project management process of a leading global software company
- Understand the business needs of a very volatile environment
- Learning to deal with extremely critical and complex situations
- Get in touch with a variety of areas within SAP, such as support, consulting, product development, controlling
- Find your place in our international and culturally diverse team in order to be successful

### Education and Qualifications / Skills and Competencies

You are enthusiastic about cutting-edge cloud services. You have the desire to learn, share and apply new technologies at a rapid pace. You have the ability to analyze complex matters and provide multiple solutions to given requirements.

- Student (f/m/d) at a university or college (computer science, engineering or similar area )
- Programming skills in more than one programming language such as Java-/TypeScript, GO, Python, Kotlin, Swift, Java or C/C++
- Language skills: Fluent English; German would be a plus
- Computer skills: Experience with Microsoft Office applications (especially PowerPoint, Excel, Word)
- Soft Skills: Good analytical, interpersonal and communication skills; high quality awareness and the ability to structure your tasks; result-oriented; open-minded and positive attitude
- Initial experiences in one or more of the following languages: Python, Golang, Groovy, Java
- Very good language skills in English, German is a plus
- Team player, can-do attitude, self-motivated
