

Manuelle Konfiguration - eduroam

ZIM – Center for Information Technology and Media Management

Contents of this page:

[General manual configuration ZIM-Support](#)

General

With eduroam, registered users can access the academic network easily, quickly and without additional registration, not only at their own institution but also at other academic institutions. The eduroam WLAN is embedded in corresponding European projects (see www.eduroam.org), which should also enable the transparent use of scientific networks across borders. There are no additional costs for eduroam users, as is the case for the use of commercial hotspots, for example.

Access and requirements

The University of Potsdam offers comprehensive coverage with EDUROAM wireless LAN (WLAN) on its campus. The WLAN hardware consists of 2,500 access points in a redundant 100 Gbit/s backbone network.

Members, students and employees of the University of Potsdam thus have access to the internet. Encrypted Wi-Fi access via eduroam (short for: education roaming) is also available at many participating educational and research institutions worldwide. Eduroam is also available to visitors from other educational and research institutions at the University of Potsdam, provided that the home institution also participates in eduroam.

User name and password

Authentication: In order to establish a connection, you must enter your user name and password when setting up. As a Uni-Potsdam user, please use your username:

- **central university account (UP account)** with the addition @uni-potsdam.de. Do not use your e-mail address in the format nachname@uni-potsdam.de.
- Use your **UP account password** as the password.

Technical information

Connection: To set up eduroam on the device, you always need an active internet connection (e.g. via a mobile hotspot).

Security: The eduroam network at the university is protected with WPA2-Enterprise, i.e. communication between the access point and the end device is encrypted so that not everyone in the vicinity can read the network traffic. To ensure a secure installation, this must be set up using a configuration profile from cat.eduroam.org. A direct WLAN login with user name and password is therefore not recommended.

Locations: Participating institutions can be easily found via the eduroam Companion app. The service is described at the following URL: <https://eduroam.org/eduroam-companion-app/>.

In order to be able to use eduroam at other locations without any problems, it must be set up via the apps or with profile installation. If you set up the connection manually, a connection at other locations will not work.

VPN note: An additional VPN connection to the university's data network is required for intranet access. A service description for the [VPN University of Potsdam](#) is available on the ZIM web pages "Offers & Solutions" or the search term: "Uni Potsdam VPN".

eduroam manual configuration

You can also use these settings to set up eduroam manually on your devices.

1. Before installation, please download the certificate of the University of Potsdam.
2. Please open the following page and download the "Root certificate" file.
The file is available for download at https://corporate-pki.telekom.de/crt/GlobalRoot_Class_2.crt.
3. To establish the connection to eduroam, please open the settings -> WLAN
4. Click here on eduroam and enter the data shown in the showcase on the right.
5. Now click on "Connect"

Security: **WPA & WPA2 Enterprise**

Legitimation: **Protected EAP (PEAP)**

Schnittstelle für Nutzer und Administratoren - CA-Zertifikate

Hier können Sie das Wurzelzertifikat, das DFN-PCA-Zertifikat und das CA-Zertifikat in Ihrem Browser installieren oder alle Zertifikate in einer Datei speichern.

- Wählen Sie "Wurzelzertifikat", "DFN-PCA-Zertifikat" bzw. "DFN-CA Global G2-Zertifikat" um das jeweilige Zertifikat in Ihrem Browser zu installieren.
- Wählen Sie "Zertifikatkette anzeigen", wenn Sie die Zertifikate in einer Datei speichern möchten (PEM-Format).

Kontaktinformationen für Rückfragen finden Sie unter "Hilfe".

Bitte geben Sie den Dateinamen an, unter dem die Datei gespeichert werden soll...
