

QUICK GUIDE PSN (Potsdamer Studentennetz)

You will need your own router to access the PSN network.

1. CONNECT THE POWER AND NETWORK SOCKET

Connect the power cable (1) to the socket and the network cable (2) to the network connection in the wall. Please only use the connection labelled **WAN** or **Internet** for the network cable (2). These are usually marked with a different colour (e.g. blue).

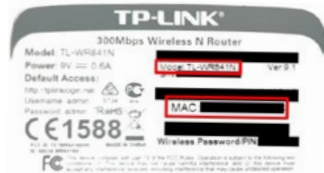

IMPORTANT:

Please make sure that the device is in **router mode**. If you are unsure, reset the device to the factory settings as described in the user manual.

2. HAVE YOUR CONNECTION ACTIVATED

Send an e-mail with the following information to: zim-service@uni-potsdam.de

- rental contract
- internet contract
- picture of the router's type plate with:
 - type designation
 - MAC-address (xx-xx-xx-xx-xx-xx)

3. WAIT FOR RESPONSE

Please leave the device switched on and connected to the network socket. The ZIM service centre will send you a message once your connection has been successfully activated.

4. YOU ARE NOW SUCCESSFULLY CONNECTED TO THE PSN.
