Apple iOS - VPN (mit Cisco Secure Client) per SSO

University of Potsdam

ZIM – Center for Information Technology and Media Management

Configuration Guide VPN Access for iPad and iPhone (with Cisco Secure Client)

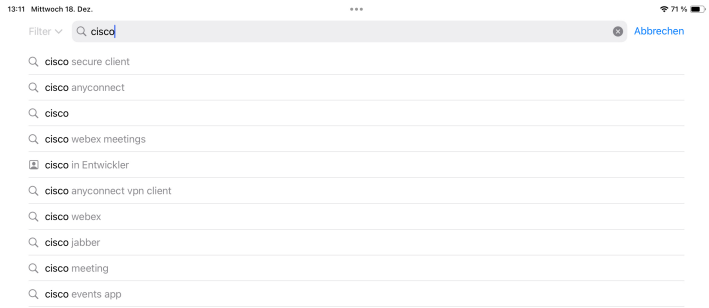
Your central university account [accountname]@uni-potsdam.de (UP-account) is a prerequisite for the installation of VPN access.

These instructions were created with an iPad Pro.

Setting up the device:

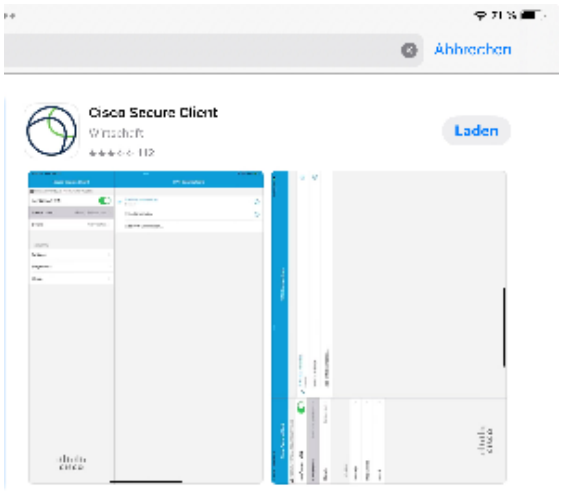
Step 1

Open the Appstore and search for "**Cisco Secure Client**".



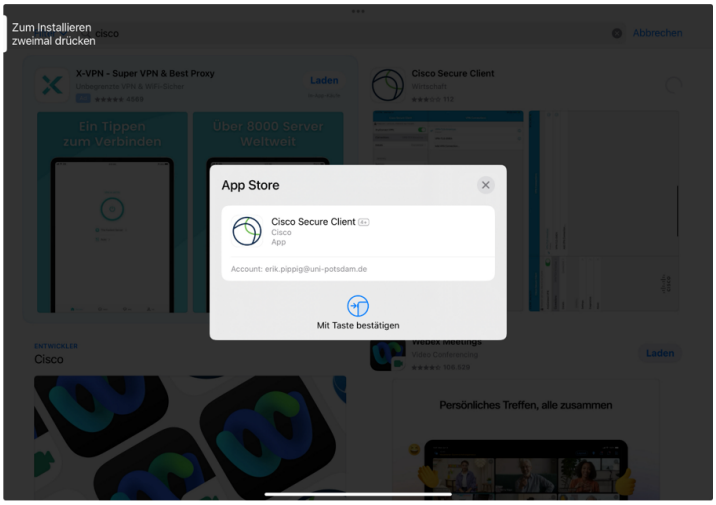
Step 2

Then download the app by clicking on ***"Download/Laden".***



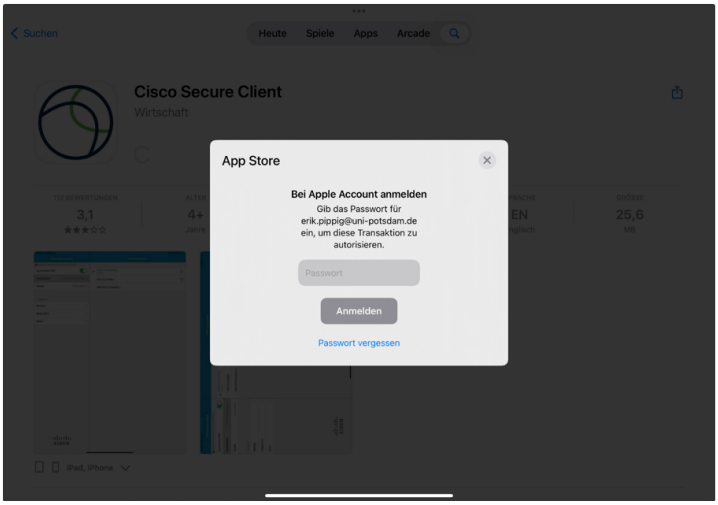
Step 3

Press the "**left iPad**" button (see picture) to confirm.



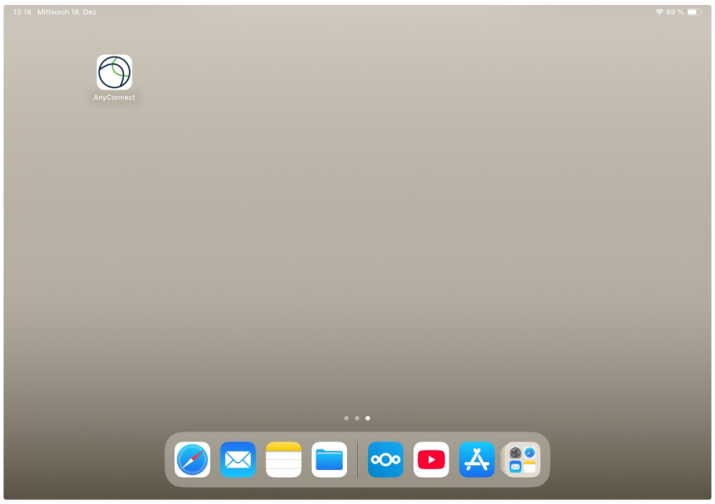
Step 4

After entering your admin password, the program will be installed.



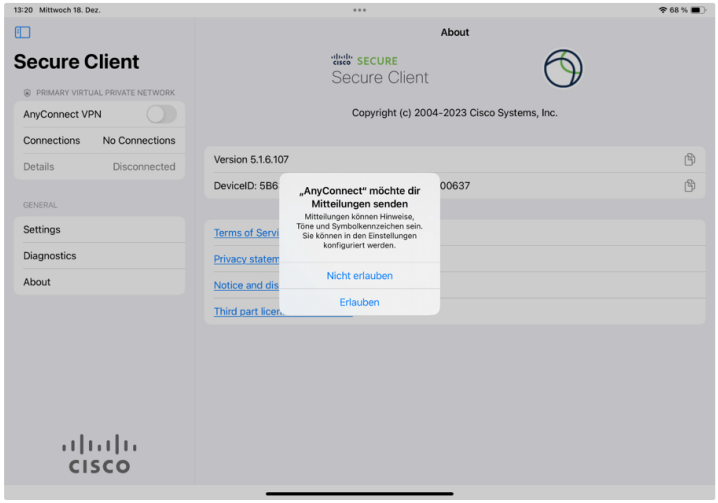
Step 5

Now select the program installed on your device.



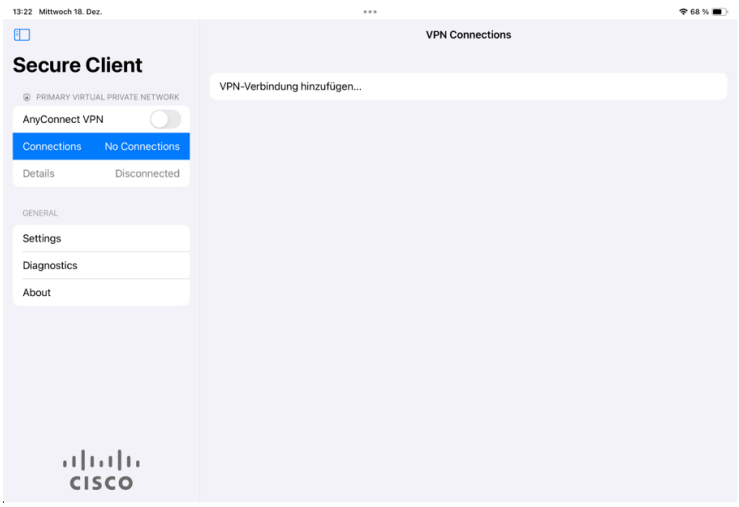
Step 6

Now you can decide whether you want to receive notifications from "**AnyConnect**" (recommendation "**allow/erlauben**")



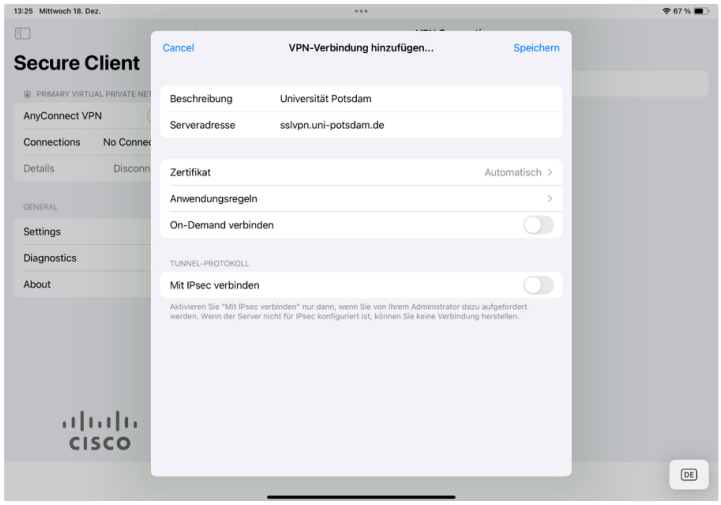
Step 7

Now set up a connection by clicking on "**Connections**".



Step 8

Next, assign a description name (e.g. **University of Potsdam**) and enter the following serveraddress: **sslvpn.uni-potsdam.de**

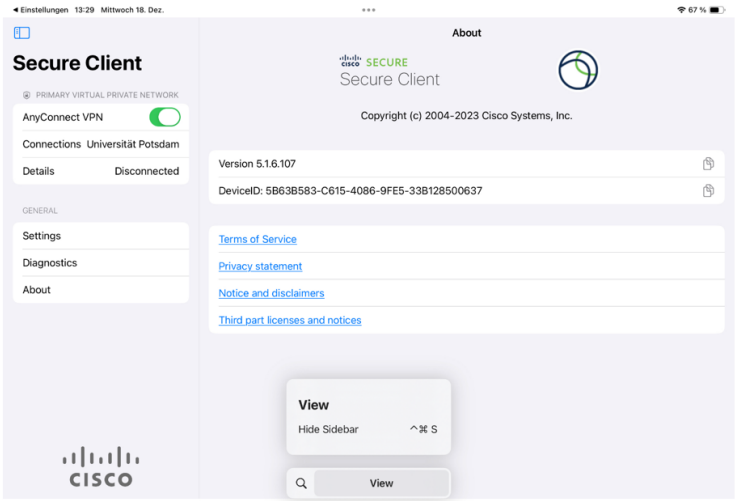


Step 9

Confirm with "**Allow/erlauben**".

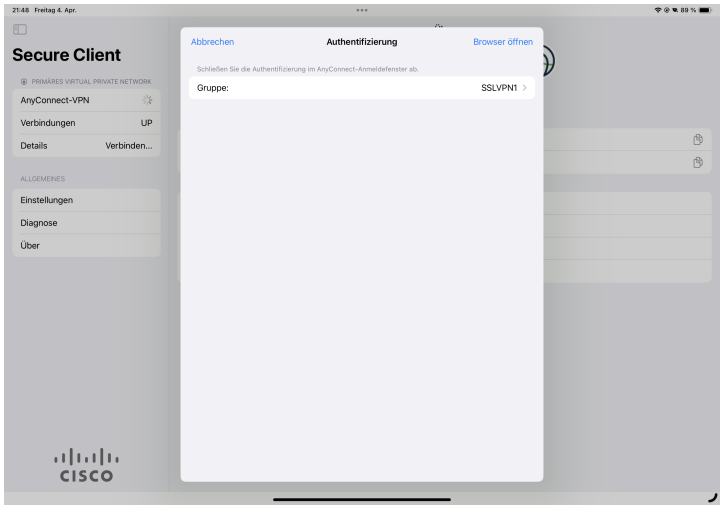
Step 10

After "**AnyConnect VPN**" changes to green (see illustration), the next step continues.



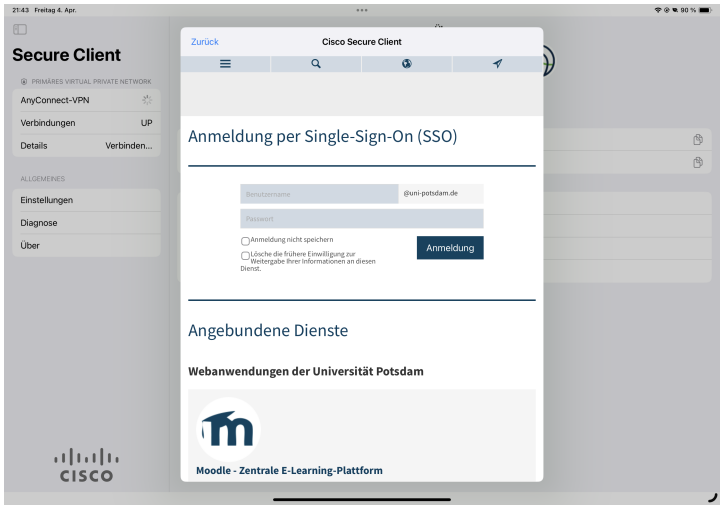
Step 11

Select the group: **SSLVPN1**.



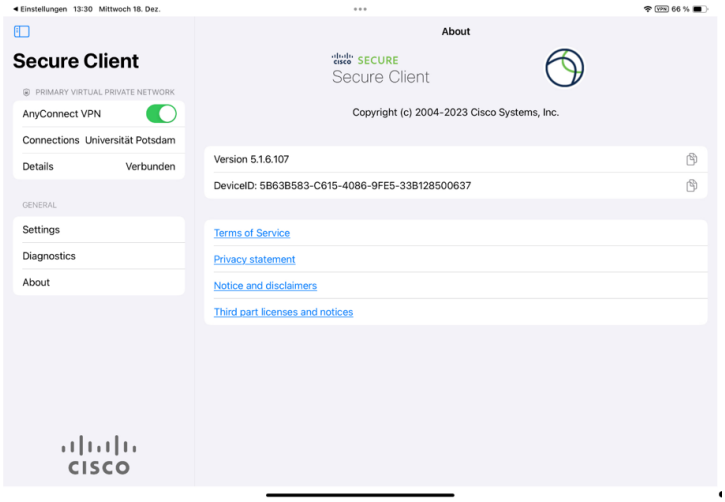
Step 12

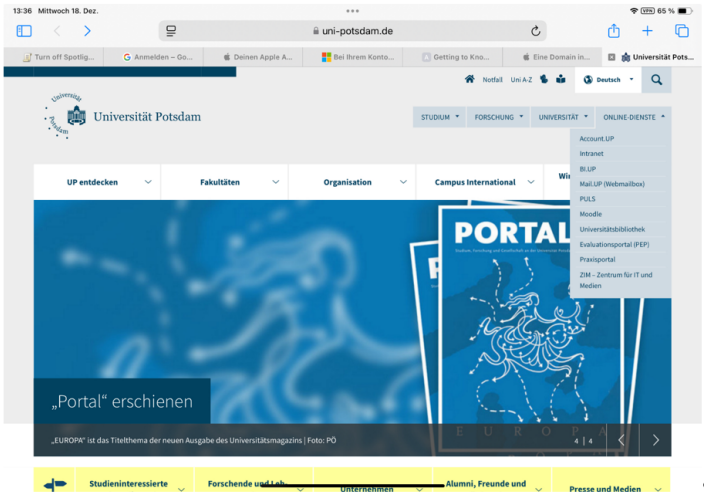
Now enter your **university account** (including password).



Step13

Connection is established.



Step 14


Intranet of the University of Potsdam opens.
