Windows 11 - VPN (mit Cisco Secure Client) per SSO

University of Potsdam

ZIM – Center for Information Technology and Media Management

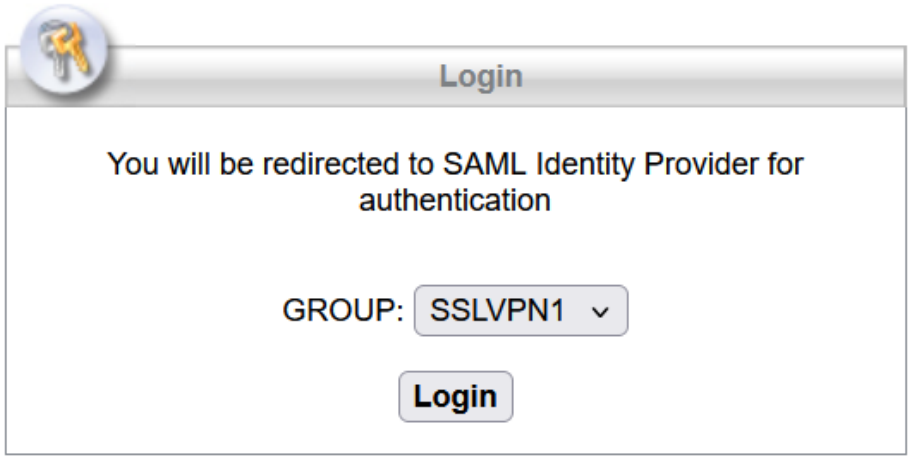
Configuration Guide VPN Access for Windows 8, 10 und 11 (with Cisco Secure Client)

The following requirements are necessary for the installation:

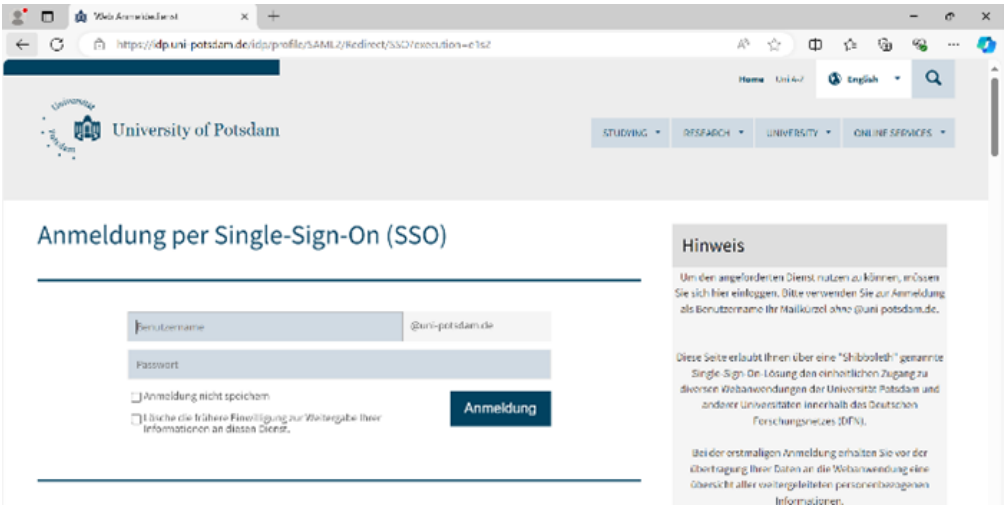
- Central university account account@uni-potsdam.de

Setting up the device:

Connect your computer to the Internet and open a browser (e.g. Firefox). Enter the following URL: https://sslvpn.uni-potsdam.de and the adjacent window will open.



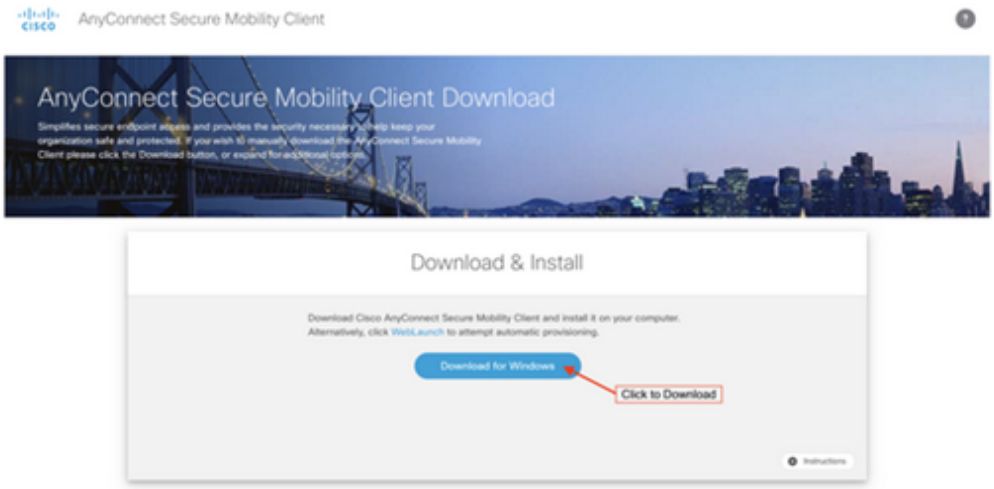
Please enter your central UP account data here.



From now on, 9 steps to success.

Step 1:

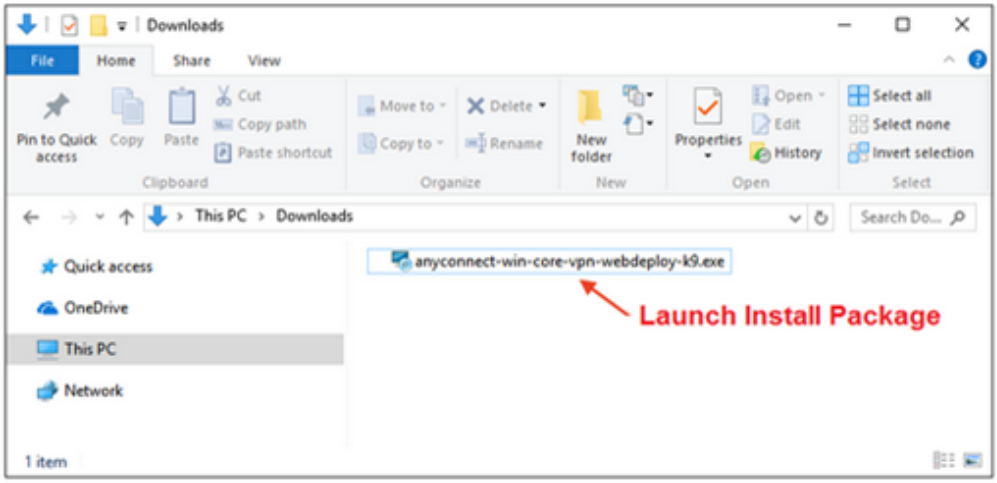
Click "**Download for windows**" to save the installation package.



Step 2:

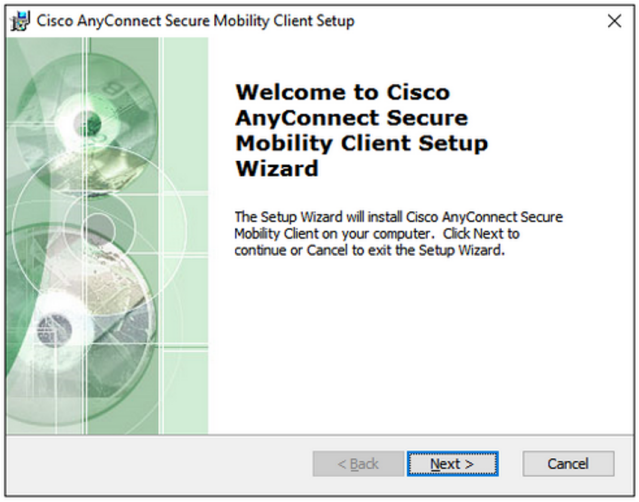
Locate and open the downloaded installation package. (can be exe or msi-file)

Approve everything when running for example Defender warning.



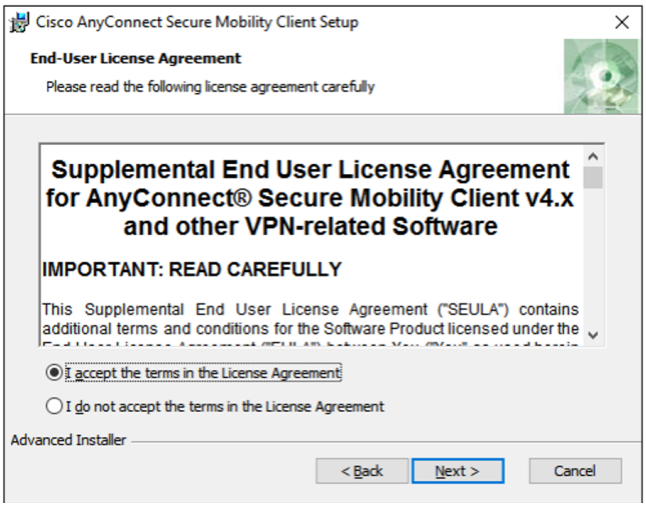
Step 3:

On the “Welcome to the AnyConnect Secure Mobility Client Wizard” screen, click “**Next**”.



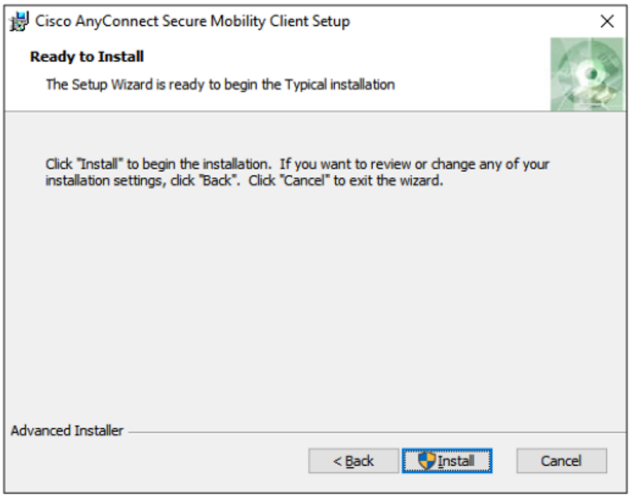
Step 4:

Agree to the software license agreement and click "**Next**".



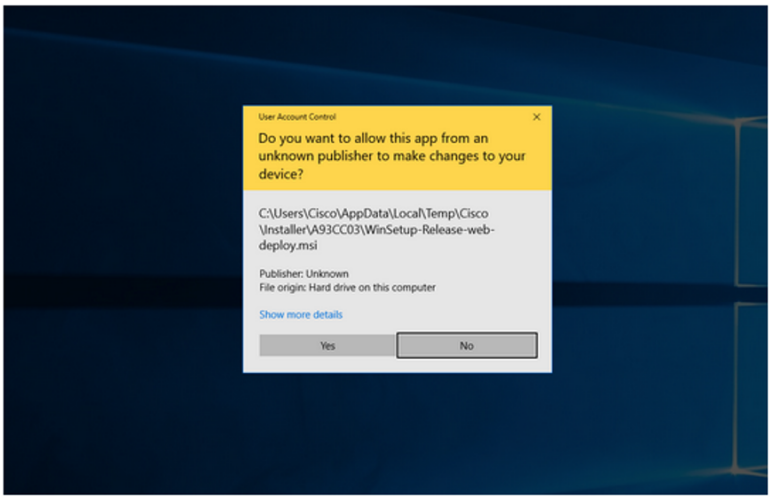
Step 5:

Click"**Install**" to start the installation.

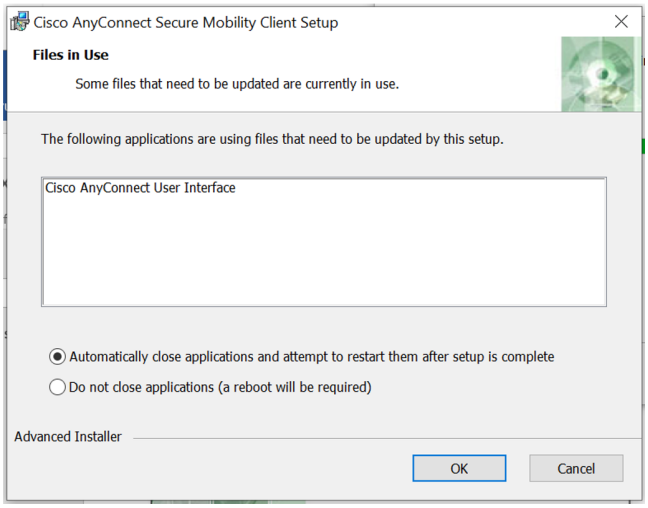


Step 6:

You must have elevated rights to install Cisco Secure Client. When prompted, select "**Yes"** to continue with the installation.

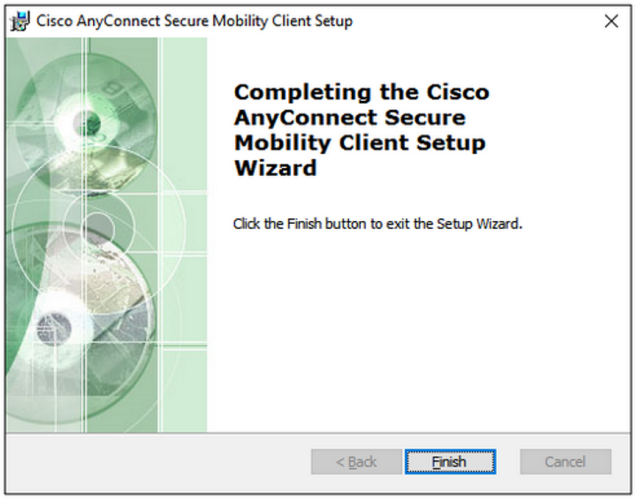


Possibly Confirm automatic restart with "**ok**".



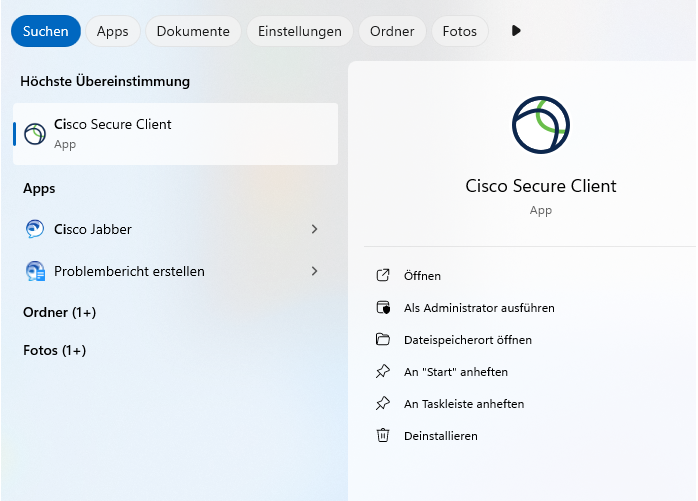
Step 7:

You have successfully installed the Cisco Secure Client and can start using it. Click "**Finish**" to exit the Setup Wizard.



Step 8:

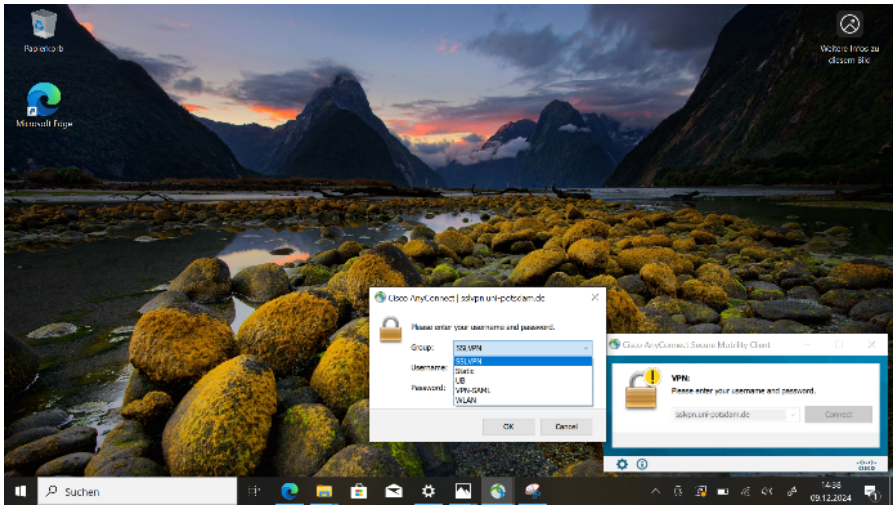
Start the Cisco Secure Client from the start menu.

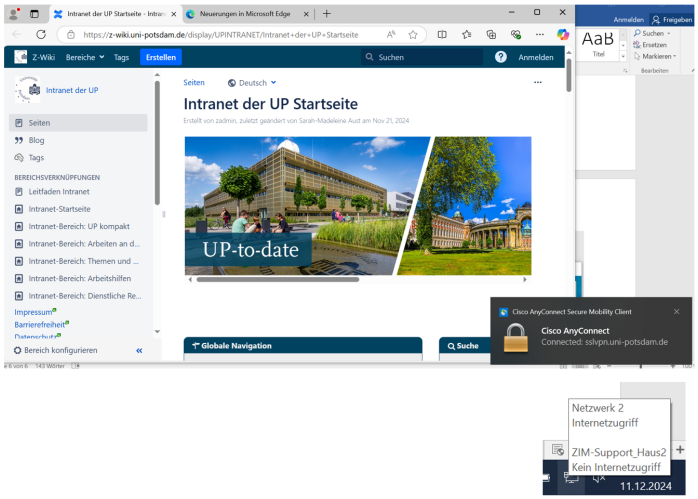


Step 9:

To establish a secure VPN connection, please enter **sslvpn.uni-potsdam.de** and click on **"Connect"**.

Please select SSL-VPN as the group. In the login window, please enter your central UP account and password. You will then be connected to VPN.





Intranet Uni Potsdam opens.
