Political Leaders and Changing Local Democracy

The European Mayor

Reihe: Governance and Public Management

- **Presents and compares original survey data from mayors in 30 European countries**
- **Examines the attitudes of mayors towards recent administrative and territorial reforms**
- **Sheds light on the social background and early political career of Europe's mayors**

This book studies political leadership at the local level, based on data from a survey of the mayors of cities of more than 10,000 inhabitants in 29 European countries carried out between 2014 and 2016. The book compares these results with those of a similar survey conducted ten years ago. From this comparative perspective, the book examines how to become a mayor in Europe today, the attitudes of these politicians towards administrative and territorial reforms, their notions of democracy, their political priorities, whether or not party politicization plays a role at the municipal level, and how mayors interact with other actors in the local political arena. This study addresses students, academics and practitioners concerned at different levels with the functioning and reforms of the municipal level of local government.
